A smarter way to send data

Whether you need to reach new customers, link to WAN/LANs or simply connect to the Internet, talk to us. As Europe's largest, most densely connected network, our layer 2 Ethernet services connects you to 23 Metropolitan Area Networks (MANs) providing access to more than 300 points of presence (PoPs). Our solutions are also incredibly flexible. Choose between fixed rate, fixed and burstable, open port or a total usage based options and between point to point or multipoint architectures - giving you a single interface at the hub with multiple destinations, thus reducing the need for individually presented circuits at the hub end.

And whilst there's no news in the fact that Ethernet services provide a more cost effective way to transport data, you'll be pleasantly surprised by the fact that we provide the kind of service levels normally associated with SDH circuits, at a fraction of the price. Not only that, our billing structure ensures you are billed accurately and fairly for what your company uses (no penalties for occasional high or extraordinary peaks). Plus we'll give you secure online access to important data such as network performance statistics, invoices and trouble tickets.

Let's talk. Call +44 20 7025 9000

Product features

		Architecture Options	
		Point-to-Point	Point-to-Multipoint
Price Flexibility	Fixed Rate	✓	✓
	Burstable	✓	✓

Port, Fixed Throughput and CDR Options

Port Rate	Fixed Throughput And CDR Options Mbps
10	2, 4, 6, 8, 10
100	15, 20, 25, 30, 40, 50, 60, 70, 80, 90, 100
1000	150, 200, 250, 300, 400, 500, 600, 700, 800, 900, 1000

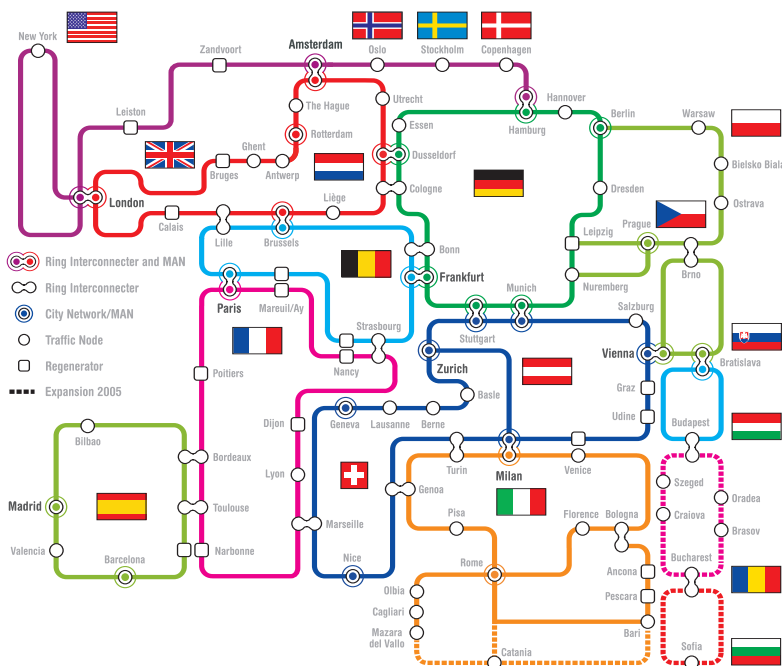

VLAN Tagging	✓
Multiple frame size support	✓
Real time reports and bill access via web	✓
Physical Presentations (MDI)	RJ45, SC/PC (Optical 1000Mb only)
Physical Interfaces	10BaseT, 100BaseTX, 1000base SX, 1000baseLH, 1000Base LX, 1000BaseZX, 1000BaseT
Service Protection	Full switch protection 802.1W, 802.1S, 802.1D
Availability Metro	99.95%
Availability Long Haul	99.95%
Framing Format	IEEE 802.3
Lead Time	15 working days
