Media Manager for high quality streaming of audio and video

As the owner of Europe's largest fibre-optic network, and operator of the application - Media Manager - we offer you a secure and highly scalable media distribution platform that is rich in functionality. Media Manager provides a complete end to end, easy to use solution, perfect for delivering streaming and digital download applications. Media Manager delivers several million digital files daily.

Our robust network of server locations provide dynamic, high volume live, simulated live and on demand, streaming and storage. We have key nodes in 47 major cities, and the European element of the network is the first in the world designed to carry 1 petabit of data (equivalent of 1,000,000 GBps or 300 million simultaneous DSL streams), which in short ensures that all digital audio/visual content is resilient and delivers the best possible viewer experience. Media Manager also makes it easy to secure your content, report and to integrate a fully global pay-per-view facility with a number of payment mechanisms, including SMS, Interactive Voice Response (IVR), PayPal and all of the major Credit/Debit Cards. But the best testimony to the quality of our service is the fact that we are the choice for many of the world's largest media and blue-chip companies.

Product features

*** QuickTime, Real and Windows**

Media hosting and streaming capabilities

*** Browser Interface**

Enables the user to upload, view, search and manage all their content. Easily used by non-technical personnel. Secure password protected access

*** Automatic URI generation**

Desktop access makes content easy to deploy across an organisation

*** Integrated DRM solution**

Content can be secured against piracy using Microsoft Media Digital Rights Management and inter-operates with other DRM solutions

*** Enhanced security features**

Secure web links, users are authenticated when they log on. Access is monitored and full log reports showing usage are provided

*** Integrated upload facility**

Can process clips ingested automatically with relevant XML Data (we can also provide bulk encoding services)

*** Real time reporting**

Details usage data, including number of viewers, megabytes downloaded and licences issued

*** Pay-per-view**

Easy to integrate global model with a number of different payment methods

*** Syndicate content**

Allows you to syndicate content to third parties whilst keeping complete control

*** Mobile Streaming**

Stream and download media rich content whilst on the move

Archive Streaming Management

The screenshot shows the 'interoute' web interface. On the left is a navigation menu with options like 'My Content', 'Manage Projects', 'Manage Groups', 'Manage Licenses', 'Manage File Groups', 'View Audit Log', 'Email support', and 'Change Password'. The main area is titled 'AVAILABLE CONTENT' and contains a table with columns for Title, Author, Last Updated, Serve Until, and Click count. Below the table are controls for 'Limit to content in project' (set to 'cab') and a search bar.

Title	Author	Last Updated	Serve Until	Click count
Concert For George	Pathe	6-10-2003	--	0
